NGUYEN PHI TUAN AN

Frontend - Fullstack developer

0927183879 nptatdt@gmail.com Tan Phu district, HCM City

OBJECTIVE

I aspire to become a talented full-stack developer who can make a real difference in the success of the company I work for. My goal is to excel in both front-end and back-end development while keeping up with the latest industry trends and innovations.

SKILLS

Javascript	My primary programming language, and I primarily work with libraries and frameworks built on it
React.js	Proficient in using React for building interactive user interfaces, understanding of React hooks, context API, and component lifecycle
Express.js	Using this backend framework, which based on Node.js, to build APIs
HTML & CSS (TailwindCSS)	In-depth knowledge of HTML and CSS for creating responsive and accessible web designs. Tailwind CSS is currently my favorite CSS framework
MongoDB	Proficient in using MongoDB to store and retrieve data. Currently, I use it to manage data for my projects.
Tool	Visual Studio, Github, Postman, Jira

WORK EXPERIENCE

Fujifilm business innovation Vietnam 07/2025 - Present

Senior Software engineer

- Project Description: Create new features, maintain existing features, handle configuration for MFP (Multi-Function Printer)
- Responsibilities: Worked closely with cross-functional teams to enhance and develop new features for the MFP (Multi-Function Printer), with a strong emphasis on the Panel UI experience. Beyond feature development, I proactively created internal tools to improve team efficiency, including automated report generation solutions and browser extensions to simplify and standardize recurring tasks.

Bosch global software company 04/2022 - 07/2025

Frontend developer

- Project Description: Utilized an internal platform based on JIRA to create multiple workflow applications.
- Responsibilities: Developing new features, maintaining the existing codebase. Moreover, I also work closely with the customers to understand their needs and provide solutions that meet their requirements which helps me to perform as the "Asscociate of the month" in Oct 2024

Netcompany 01/2021 - 03/2022

QA/QC

- Project Description: Worked on a UK-based project called Sedex, which is related to audits.
- Responsibilities: Testing the application, identifying and reporting bugs, and ensuring that the software met the required quality standards.

EDUCATION

Tôn Đức Thắng University (Cross-border study) 2015 - 2018

Computer science

GPA: A (88.7/100)

Lunghwa University (Cross-border study) 2018 - 2020

Computer science

GPA: A (88.7/100)

CERTIFICATIONS

IELTS 6.0	Summer 2017
Lowcode platform Outsystems - Associate Reactive Developer	12/2024

HONORS & AWARDS

Associate of the month (At Bosch)	10/2024

PROJECTS

Web-app - Play and share

04/2025 - 12/2025

Developer

Kind of project: Self-Project
Team size: 1
Techonologies & Other information:

- Project description: A web application that allows users to share their favorite travel destinations, complete with images and descriptions. Moreover, users can create travel timeline, or split the money for a trip with their friends.
- Programming language: React.js, ReduxJs, TailwindCSS, Node.js, Express.js, MongoDB, Cloudinary, DnD-Kit, DaisyUI
- Deployment platform: Netlify for Front-end and Render for Back-end
- Drawback: Using the free version of Render for the back-end, which causes the server to enter sleep mode when there are no incoming requests and requires it to be woken up.
- Solution for drawback: Create a cron job to activate the App for 15 minutes each.
- Website Link: https://playandshare.netlify.app/

TAMT Wedding - Online wedding invitation

12/2024 - 02/2025

Developer

Kind of project: Self-Project
Team size: 1
Techonologies & Other information:

- Project description: An online wedding invitation website for me and my wife. The website includes information about the wedding, such as the date, location, and schedule of events, and a RSVP form for guests to confirm their attendance.
- Programming language: React.js, TailwindCSS, Motion Dev, DaisyUI, SheetDB
- Deployment platform: Netlify for Front-end
- Website Link: https://tamtwedding.netlify.app/

E-COMMERCE SHOP - JAGERTHEJAGERSHOP

04/2024 - 07/2024

Developer

Kind of project: Self-Project
Team size: 1
Techonologies & Other information:

- Project description: A web application that allows users to browse and purchase products from an online store. Users can create accounts, add items to their cart, and securely checkout with estimated shipping fee. Moreover there is an admin dashboard for the store owner to manage products, orders.
- Programming language: React.js, TailwindCSS, Node.js, Express.js, MongoDB
- Deployment platform: Netlify for Front-end and Render for Back-end
- Drawback: Using the free version of Render for the back-end, which causes the server to enter sleep mode when there are no incoming requests and requires it to be woken up
- Website Link: https://jagerthejagershop.netlify.app/

I was responsible for designing the layout and building the front-end using React.js for the e-commerce shop. On the back-end, I used Express.js to handle server-side logic, and MongoDB to manage the data for products, users, and orders
